<b>Why SSD?</b>	Solid State Drives (SSDs) have no moving parts, making them 5 to 31 times faster than a mechanical drive. Windows 10 only runs well with a fast hard drive, so unless you're a very patient person, never run it on a mechanical hard drive. SSDs come in three flavours, with SATA (5.5 times faster than mechanical), M.2 (9.5 times faster), and NVME (an incredible 31 times faster).
<b>What is IPS?</b>	IPS (In-Plane Switching) screens give better colour and viewing angles than TFT screens.
<b>Why HDMI?</b>	HDMI ports allow you to connect your laptop to a big screen TV or projector with just one cable.
<b>Why USB 3.0?</b>	USB 3.0 has the same connection as the older USB 2.0 and 1.1 that we're used to, and older USB devices work fine in USB 3.0 ports, but plug a USB 3.0 device in a USB 3.0 port and watch those files fly - USB 3.0 (4800Mbps) can transfer files almost 10 times faster than USB 2.0 (480Mbps.)
<b>MIL-STD-810?</b>	This is a military spec that requires the laptop to pass various tests for shock (being dropped two feet to a hard surface), vibration, and exposure to dust, humidity and extreme temperatures.

\*Speedmark shows performance of CPU for business tasks - 1000 is the bare minimum for business tasks.

\*\*Gaming performance ranges from 2000 (720 with low graphic quality) to 16000+ (4K with ultra graphic quality.)

Laptop prices include Windows 10 installation, configuration, optimization, and creation of recovery USB.
