Jan 21, 2019

All systems come with the MS Office compatible, LibreOffice Suite (wordprocessor, spreadsheet, presentation), Firefox, Adobe Acrobat Reader, VLC Media Player, Adobe Flash, Java and Acer System Recovery.

Included with all systems: full setup and configuration, all security updates, recovery CDs, top-rated Managed Anti-Virus with one year of updates and a notebook surge protector. **Over \$240 in free extras!**

Acer is the second largest manufacturer of laptops in the world, ahead of Toshiba, Dell and Lenovo, and is the largest manufacturer in Europe, the Middle East, and Asia.

These notebooks are tough! They beat out Dell and Toshiba in CMP's Notebook Abuse Test (they were pulled off a desk by the power cord, dropped 3.5 feet to the floor, had four ounces of cola poured into the keyboard and rolled down a flight of stairs.)

Only the Acer Laptop and Panasonic Toughbook survived all four tests. (HP and Lenovo refused to take part.)

All notebooks have Ethernet (wired high-speed), and wireless connections.

What is MIMO?	Multiple Input, Multiple Output antenna technology gives you better, faster connections for your WIFI.
Why HDMI?	HDMI ports allow you to connect your laptop to a big screen TV or projector, and transfer both the video and the sound, so you can play your Netflix or show off home movies or photos on your big screen TV with just one cable.
Why USB 3.0?	USB 3.0 has the same connection as the older USB 2.0 and 1.1 that we're used to, and older USB devices work fine in USB 3.0 ports, but plug a USB 3.0 device in a USB 3.0 port and watch those files fly - USB 3.0 can transfer data a up to 4.8Gbps or almost 10 times faster than USB 2.0 (which transfers at 480Mbps).
What is USB-C?	With a new connector, USB-C gives you up to twice the speed of USB 3.0 and a simple connector that plugs in either way (so you don't have to keep flipping that darn connector).
